KAIROS MAKES A CALL TO END THE WAR

KAIROS, which is a team of educational leaders from different parts of the world committed to the transformation of education as a fundamental pillar for the construction of a better society for everyone in which no one is left behind, makes a unanimous and firm call to put an end to the war.

Every day more human lives are lost, there are more wounded, mutilated, families suffering from the loss of their loved ones, orphaned children on both sides. Regardless of the final result of the war, these deaths will not be reversed, as well as all the suffering and pain. There are also millions of people and families displaced or suffering physically and emotionally from the harshness of the war.

Every day there is more destruction in the places of battle, but also a greater economic and therefore social impact throughout the world that affects above all individuals and families with fewer resources, but in one way or another the entire society.

Every day more resources are allocated to war, destruction and death, resources that should be allocated to combat hunger, poverty, the digital divide, climate change and to improve health, education, to create jobs, to comply with the SDGs, etc.

Today more than ever the force of reason must prevail, not the reason of force.

KAIROS makes a call to leave behind egos and particular interests that frequently prevail over general interests, because the lives of people and the well-being of society are worth more than the pyrrhic military triumphs, obtained at the cost of enormous human sacrifices.

KAIROS calls to sit at the same table to reach agreements that end the war in Ukraine and guarantee true peace and security for all countries and for the entire world.

KAIRÓS first addresses:

-His Holiness Pope Francis, and

-His Excellency the Secretary General of the United Nations, Antonio Guterres.

May they go down in history for their leadership in favor of peace and life, not for what they should have done and did not do. In this perspective, KAIRÓS requests their high intervention to invite the following authorities to sit at the same table in a dialogue for peace:

Joe Biden	President of the USA
Xi Jinping	President of China
Recep Tayyip Erdoğan	President of Turkey
Vladimir Putin	President of Russia
Volodymyr Zelensky	President of Ukraine
Jens Stoltenberg	Secretary General of NATO
Ursula Gertrud von der Leyen	President of the European Commission
Roberta Metsola	President of the European Parliament

Let those who refuse to do so, assume the political costs and carry on their shoulders and on their conscience the weight of the dead, wounded and maimed every day, as well as the economic and social costs for the entire world.

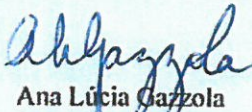

As KAIRÓS, we also make a respectful call to political, economic and social actors, journalists, academics and intellectuals from all over the world, to support the fight for peace, for life instead of death, whatever their political color or religious belief are. We should all be active and belligerent for peace, rather than passive or active for war. Part of the solution, not part of the problem.

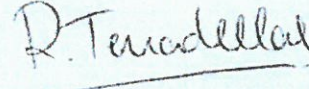

This might seem unfeasible: but did anyone consider it feasible for the entire world to come to a standstill due to a pandemic? Is it unrealistic to think about the risk for the entire planet, should existing nuclear weapons be activated? Is it impossible for the world to collapse if climate change is not controlled? Is it impossible for the entire world to experience a serious crisis if the huge existing social gaps continue or widen? And so on. Are we going to wait for that to happen? NO, PLEASE!

"There is no path to peace, peace is the path." Mahatma Gandhi

We attach a list of KAIRÓS members who unanimously make this call.
